Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of species of figure 5G, claims 1-22 are corresponding to elected figure 5G in the reply filed on 10/03/2007 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Pacetti et al. (U.S. 6,712,844).

Pacetti et al. discloses the claimed invention in figures 1-7, A medical device (10) having a visualization region in which visualization using magnetic resonance imaging (MRI) is desired which comprises a tubular primary structure (40,49,50,52) having a wall with openings therein and a periphery, the structural material being configured such that any closed path, in the visualization region, extending about at least one of the periphery; wherein the tubular primary structure (40,49,50,52) including a plurality of electrically conductive cells (40,49); and a plurality of ceramic or polymer connectors or bridges (52,54, see col. 7, lines 28-43) coupled to and forming electrical discontinuities in the plurality of electrically conductive cells (40,49), the electrical discontinuities being

Art Unit: 3734

sufficient to enable MRI visualization in the visualization region; and wherein each of the plurality of conductive cells (40,49) is coupled to at least one of the plurality of ceramic or polymer connectors or bridges (52,54) such that any closed path defining the cell in the visualization region passes through the at least one bridge, inhibiting formation of an electrical loop in the visualization region.

Conclusion

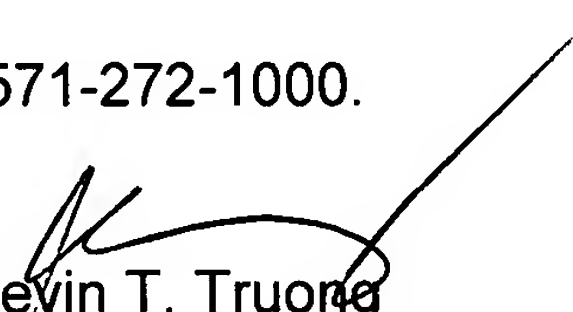

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hong et al. (U.S. 6,866,805) discloses stent comprises a plurality rings with polymer connectors thereof.
